

Assignment 1

06/10/2022

Mobile and Wearable Computing

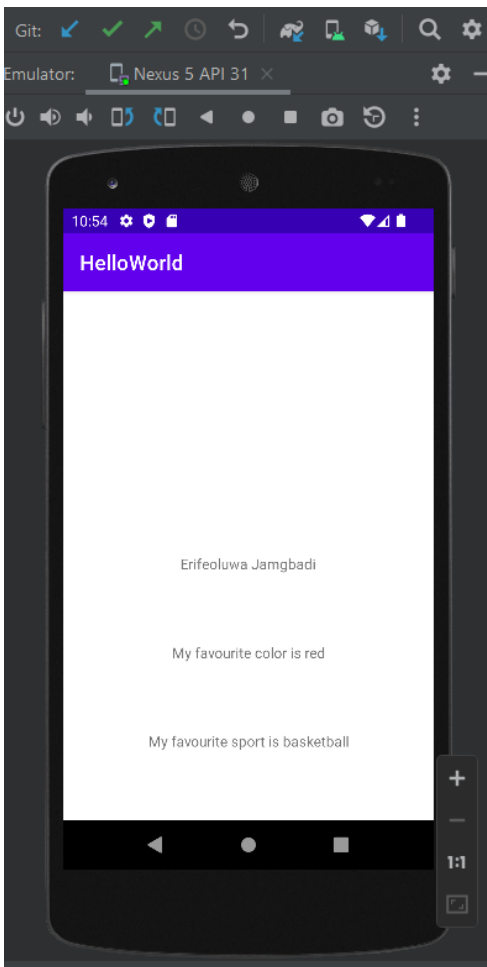

Erifeoluwa Jamgbadi

Answers to/solutions of the single exercises in the assignment

- For part of the exercise on changing the helloWorld already displayed on the phone screen, I just changed the text to my name in the text Attribute section.
- In the activity_main.xml, I added textView to the Component Tree for my favorite colour text and my favorite sport text.
- I then fixed the error of “*missing constraint in constraintlayout*”, that I was getting by adding the constraints in the attributes section and adjusting the measurements.
